WATER SAVING

PULIZIA FACILE E VELOCE
EASY AND FAST CLEANING

Tutti i vasi Baden Baden sono rimless, ossia senza brida, cioè senza il bordo attraverso cui passa il risciacquo d'acqua che rappresenta circa il 20% del bacino interno del sanitario ed è generalmente di difficile pulizia. Il nuovo sistema di scarico determina un design molto più lineare e consente una pulizia più facile, efficace e senza schizzi, a garanzia di una migliore igiene. Con un effetto estetico sicuramente superiore.

All Baden Baden vases are rimless, i.e. without the edge through which the water passes, an edge that represents approximately 20% of the inner basin of the toilet, and is usually difficult to clean. The new flushing system results in a much more linear design that is easier to clean. Flushing is more effective, with less spray, for superior hygiene. And with a decidedly superior aesthetic effect.

Toutes les toilettes Baden Baden sont sans rabat, c'est-à-dire sans la partie à travers laquelle passe l'eau de rinçage représentant environ 20% de la cuvette interne, généralement difficile à nettoyer. Le nouveau système de chasse d'eau produit un design bien plus linéaire et permet un nettoyage plus facile, efficace et sans éclaboussures, en garantie d'une meilleure hygiène. Avec un effet esthétique nettement supérieur.

Alle Baden Baden WCs sind "rimless", d.h. ohne den Rand, durch den das Spülwasser verläuft, und der ca. 20% des Innenbeckens eines WCs ausmacht und meist relativ schwierig zu reinigen ist. Das neue Spülsystem hingegen ermöglicht ein deutlich lineares, reinigungsfreundlicheres Design, das effizient, spritzfrei und somit Garantie für mehr Hygiene ist. Und auch die Optik wird dadurch aufgewertet.

У унитазов Baden Baden нет бортиков, за которыми скрываются отверстия для смывной воды и которые порой составляют до 20% объема чаши. Из-за бортиков унитаза бывает трудно поддерживать в чистоте, а при новой системе ополаскивания не образуется брызг, гигиенический уход за унитазом становится простым и эффективным, а сама чаша приобретает простую и лаконичную форму, выигрывая в эстетичности.
